

Stressed, fatigued or sick?

OXYGEN

c o u l d b e y o u r a n s w e r

Lack of oxygen affects the immune system. Oxygen is one of the five elements required to sustain life. It is also one of the most important. For decades it has been

successfully used to treat the sick. Oxygen deficiency, or oxygen starvation, is arguably the greatest cause of disease.

Oxygen provides life and energy to every cell.

If the body is abused by poor eating and drinking habits, air pollution, drugs or lack of exercise, cells are deprived of oxygen and the immune system weakened. When there is insufficient oxygen to support a healthy cell, the cell turns to another source of energy, usually sugar fermentation. This is undesirable because it upsets the metabolism of the cell and causes it to manufacture improper chemicals. Soon there is a whole group of unhealthy and weak cells which have lost their natural immune system. These are open to invasion by

viruses which can result in health problems such as cancers, candida, seizures, nerve deterioration and many more. But oxygen is not only a life-giver, it is also a killer ... a killer of harmful anaerobic infectious bacteria. These bacteria cannot grow or survive where there are high levels of oxygen. Oxygen is also naturally selective in what it kills. Unlike drugs and antibiotics, it does not harm the aerobic, or beneficial bacteria, which are essential for good health. Only oxygen can selectively kill the bad

reverse this trend. Aerobic Oxygen™ is non-toxic, stabilized electrolytes of oxygen in molecular form. Research has not yet found an anaerobic infectious or disease bacteria that Aerobic Oxygen™ does not kill. It is effective against Salmonella, Cholera, E. coli, Streptococcus, Pseudomonas and Staphylococcus — even against Giardia Lamblia (Beaver Fever). Aerobic Oxygen™ is virtually the only almost-tasteless product known that will kill these harmful bacteria without killing the body's beneficial bacteria.

Aerobic Oxygen™ is NOT hydrogen peroxide.

Ease of mobility and lack of sufficient and systematic exercise result in a bloodstream depleted of oxygen. Many of us do not process enough oxygen to live a healthy life. Less than adequate oxygenation of tissues and cells (a condition called **Hypoxia**) can lead to a number of degenerative illnesses, such as circulatory problems, digestive disorders and even cancer. If the body is stressed it will cause an oxygen deficiency, and there are four major types of stress

Lack of oxygen strangles the immune system

without killing the good.

Our modern sedentary life-styles prevent most of us from processing enough oxygen to resist disease and stay healthy. Aerobic Oxygen™ can help

Oxygen empowers your immune system and sustains health and vitality. Athletes improved their performance and people who were stressed, fatigued or sick say they restored their health by taking our AEROBIC OXYGEN™.

Aerobic Oxygen™ is a registered Trade Mark.

TESTIMONIALS INSIDE ►

Oxygen is vital

which deplete oxygen:

1: TOXIC STRESS

— stress resulting from toxic environmental chemicals requires the use of extra oxygen: since oxygen is used in all detoxification processes.

2: EMOTIONAL STRESS

— stress everyone is familiar with; it brings about the production of adrenaline and adrenal-related hormones which utilize oxygen.

3: PHYSICAL TRAUMA

— reduces circulation and the subsequent oxygen supply to a great many cells and tissues throughout the entire body.

4: INFECTIONS — use up “free-radical” forms of oxygen to combat bacteria, fungi and viruses. Frequent use of drugs to counteract infections also depletes cellular oxygen since oxygen is required to metabolize them out of the system. Oxygen is one of the most important keys to good health, but not everyone is aware of it. Currently scientists are examining the role oxygen starvation plays in the development of disease.

The four modern-day stressors — toxic stress, emotional stress, physical trauma and infections — draw upon and excessively deplete the body's oxygen supply. If the stress or stressor are not reduced, the individual becomes susceptible to a number of infirmities. Oxygen is indeed an important key to good health, and research has shown that there is a significant difference in the amount of oxygen in a strong healthy

person and a chronically ill individual. The industrial revolution, technological advancements and modern transportation have seriously depleted oxygen levels in the atmosphere. Our obsession with carbon-based fuels to power generators, planes and automobiles consume vast amounts oxygen daily. This trend is unlikely to change in the near future.

Improper diets drain oxygen from our bodies

The majority of people eat food that is excessively acidic.

Their diet emphasizes red meat, coffee and even soda pop. This causes the development of an acid (less-than-optimally

alkaline) constitution with an excess of positively-charged hydrogen ions (H+) in the entire system. When excessive numbers of hydrogen ions are in the tissues, they combine with and use up oxygen. This reduces the amount of oxygen available for the primary function of metabolism. Health problems follow.

An oxygen deficiency plays an important part in cellular contamination. Oxygen is a powerful detoxifier and when its quantity is deficient, toxins begin to devastate bodily functions and deplete the body of life-giving energy.

Dr. Freibott explains why oxygen and oxidation is so vital: *“It is the lack of oxygen in proper amounts in the system that prevents oxidation and oxygenation, which energizes the cell to biological regeneration. These processes are the*

“foundation of life and death.”

Dr. Otto Warburg, who won the Nobel Prize for Medicine, proved that the **GROWTH OF CANCER IS INHIBITED IN A HIGH-OXYGEN ENVIRONMENT.** His Nobel laureate lecture showed that when *oxidation fails* and *fermentation is substituted* for a cell's energy, the *pathway to cancer is opened.*

Today, noted authorities also stress that most disease, especially yeast or fungal infections like candida albicans, occur most frequently in any oxygen-poor environment in the body.

Dr. Parris Kidd has stated that: *“Oxygen plays a pivotal role in the proper functioning of the immune system; i.e.. resistance to disease, bacteria and viruses.”*

An unfortunate side effect of antibiotic therapy is that it generally is not as selective and kills the good bacteria as well as the bad. When levels of beneficial bacteria are reduced we lose our natural balance that keeps the disease-causing bacteria under control.

Dr. Steven Levine, a respected nutrition researcher, has stated that: *“We can look at oxygen deficiency as the single greatest cause of all diseases.”*

There is currently a virtual epidemic of common yeast infections (Candida Albicans). These take root with relative ease in an oxygen-deprived body. In this environment, yeast cells generate large quantities of acetaldehyde, causing cellular damage.

Acetaldehyde in the intestinal wall and liver disrupt intestinal absorption and impair white and red blood cell functions.

When yeast cells are deprived of oxygen, they become even more resistant to immune defences, since they are capable of anaerobic (no-oxygen) metabolism. A low oxygen level is the major

Many of us do not process enough oxygen to live a healthy life

contributing factor to yeast susceptibility.

In addition, oxygen-starved tissues can generate the following disorders: heart disease, strokes, diabetes and peripheral arterial deficiency. An inadequate oxygen supply will also contribute to memory loss, dizziness, loss of balance, and depression in older persons with decreased cerebral blood flow.

Oxygen levels are also vital in maintaining the balance of "friendly" bacteria over disease-causing bacteria, and other organisms in the body.

Research observation and reports from Doctors who are prescribing Aerobic Oxygen™ for their patients:

- 1 It removed chlorine from drinking water and killed infectious bacteria.
- 2 Stopped epileptic attacks and assisted patients with Alzheimer's disease.
- 3 Cancer cells will not grow in the presence of oxygen.
- 4 Twenty drops of Aerobic Oxygen™ in a glass of water three times daily reduced emphysema symptoms. After about three days of treatment, the bronchial infection (which accompanies emphysema) begins breaking up. Then, the Aerobic Oxygen™ begins furnishing oxygen which the lungs were previously incapable of producing.

Chronic sinus infections begin breaking up generally on the third day. Aerobic Oxygen™ was continued until the infection cleared.

- 5 Beneficial to patients with respiratory problems. Even when the patient was using an oxygen mask, after several days

on Aerobic Oxygen™ the patient was able to discontinue using the mask.

- 6 Puts oxygen into the blood so fast it can prevent heart damage due to lack of oxygen.
- 7 If red cells clump, 20 to 30 drops of Aerobic Oxygen™ in water will separate them after one hour.

8 Candidiasis — 20 drops of Aerobic Oxygen™ in Aloe Vera three times a day will clear it up. Iowa University calls Candidiasis a lesser form of AIDS.

9 Helps digestion. Most food rots before digestion is complete causing the spread of infectious bacteria.

10 Sore throats, ulcers and kidney infections all benefited by the use of 20 drops of Aerobic Oxygen™ in water three times per day.

11 Some dentists inject a 30% Aerobic Oxygen™, 70% saline solution into infected gums in place of surgery. They also use it full strength after drilling, and before fillings are put in, to prevent infection. Other clinics are using 30% Aerobic Oxygen™, 70% saline solution intravenous for cancer, leukemia and other chronic infections.

12 Viral or bacterial infections anywhere in the body, and common colds, were reversed by the use of Aerobic Oxygen™. Twenty drops of Aerobic Oxygen™, mixed in a teaspoon of honey and warm water, were administered three times daily until the infections cleared. Aerobic Oxygen™ acted the same as antibiotics: but with no side effects.

13 Asthma, breathing and heart attacks, were also relieved by Aerobic Oxygen™. Forty drops of Aerobic Oxygen™ mixed in an ounce of brandy (or pure apple juice), quickly puts vital oxygen into the bloodstream. This helped prevent heart muscle damage due to a shortage of

oxygen.

PROSTATE CANCER Doctors diagnosed a 53-year-old east Tennessee man as having prostate cancer and gave him a short time to live. A blood test in March, 1993 showed his blood-cancer-count to be 40 (out of range). About June, 1993 he started taking "AEROBIC OXYGEN™." Over a period of five days, he gradually increased his "AEROBIC OXYGEN™" from ten drops morning and night (in a 6-8 ounce glass of water) to 20 drops, five times a day in a glass of water. His condition showed significant improvement and his next blood test in July, showed his cancer count had dropped to 0.1 (in the in range)

LYMPHOMA A 49-year-old North Carolina man had lymphoma. His spleen was five times bigger than normal and his liver was greatly enlarged. His doctor commenced chemotherapy treatment but said he wouldn't live to see his 50th birthday. A friend spoke to him about "AEROBIC OXYGEN™" and he began taking it regularly. He said he immediately felt better and had far more energy. He gradually increased his "AEROBIC OXYGEN™" to 20 drops in a glass of water, five times a day. After his next scheduled chemotherapy treatment, the doctor noticed that his white corpuscle count was normal. Previously, the doctor had to give him an injection to boost his white corpuscle count after each dose of chemotherapy. Within three months of taking "AEROBIC OXYGEN™", all his organs had returned to normal and his doctor reported no trace of cancer in his body.

LUPUS A North Carolina woman who had lupus took "AEROBIC OXYGEN™." For a long time, she had a sore on her face which wouldn't respond to treatment. Soon after taking "AEROBIC OXYGEN™" it completely disappeared.

ANGINA / HIGH BLOOD PRESSURE A woman in Canada reported that her

Aerobic Oxygen

angina attacks had disappeared after taking "AEROBIC OXYGEN™." The "AEROBIC OXYGEN™" helped remove calcium deposits and cholesterol from her bloodstream and her high blood pressure returned to normal. A lady from Florida had a history of high blood pressure reaching 200/120. When it would not respond to medical treatment she began taking "AEROBIC OXYGEN™." Three months later, her doctor reported her blood pressure had fallen to 130/80.

BLOOD CLOT, HEART, BLOOD PRESSURE, VARICOSE

VEINS A Canadian woman had a huge black blood clot 24" x 12" from her right thigh up to her navel. It developed from a profusely bleeding artery, following an angiogram and angioplasty. Two of her heart valves were also not closing properly causing a double heart beat. Her arteries were clogged, her blood pressure varied between 185/85 to 195/95 and she had prominent varicose veins. Three months after taking "AEROBIC OXYGEN™", the clot had reduced to the size of a small walnut, the bruising had faded to a dirty grey and her varicose veins had disappeared. Her blood pressure dropped to 110/60 and her heart beat and valves returned to normal.

HIGH CHOLESTEROL

A Nashville man who was suffering from very high levels of cholesterol decided to take AEROBIC OXYGEN™. After just eighty-seven days, a blood test showed his cholesterol had fallen from 241 to 170. AEROBIC OXYGEN™ also reduced the painful side effects caused by his prescription drugs.

COLON CANCER A central Tennessee man has been fighting colon cancer for more than six years. He has had numerous chemotherapy treatments and 19 operations. Just when doctors believed his cancer to be in remission, tests showed it had broken out in his

liver. Doctors administered another chemotherapy treatment. After he heard about the benefits of "AEROBIC OXYGEN™", he began taking it regularly. Just three-and-a-half weeks later, he returned to hospital for more tests and further chemotherapy. Those tests showed his CEA had dropped from 313 to 85. Previously, his

CEA increased after treatment. His tests also confirmed there had been no further liver damage, nor had his white corpuscle count been depleted by the last chemotherapy treatment (as had been the case previously). **FIBROMYALGIA** A 58-year-old Calgary woman, had suffered chronic sinus infections, ear infections and sore throats for many years. In addition, fibromyalgia often left her tired and exhausted. The last time her doctor prescribed antibiotics she had an allergic reaction to the drug. Subsequent X-Rays revealed 6 out

of 8 sinus cavities were affected and an operation was scheduled. Meanwhile, she started taking 20 drops of Aerobic Oxygen™ morning and night. In just three weeks, she reported relief. She had far more energy, greater clarity of thought, a lot less muscle pain and slept more soundly. After only one month, her sinus infection, post nasal drip, sore throats and earaches completely disappeared and her taste and sense of smell returned. "What a bonus, I could function again," she said. "I owe all this to Aerobic Oxygen™. I have been taking the product for over two years now, and in all that time I have not even had a cold or flu."

PETS We have a lab/shepherd who lives for her ball, unfortunately she doesn't know when to stop and as a result often injures herself. A couple of months ago she really was in a bad way with her arthritis. I didn't want to give her cortisone, so I started her on M.S.M. but with limited results. So I decided to use Aerobic

Oxygen™ 15–20 drops in about 3 liters of water and in less than a week she was brand new again. After a time I stopped giving it to her and it was one evening that my husband said that she could hardly get off the floor. So I again started her on Aerobic Oxygen™ and very quickly she improved, and you would not know how crippled she was such a short time ago. Thank you for this wonderful product and for helping with our four-legged friend.

Aerobic Oxygen™ acted the same as antibiotics: but with no side effects

NOTE: the following conditions reportedly responded favorably to Oxygen therapies: Multiple sclerosis / asthma / emphysema / Epstein Barr Virus / pneumonia / hepatitis / various cancers / AIDS and other immune deficiency diseases / herpes / arthritis / malaria / Parkinson's Disease / Alzheimer's / alcoholism / leukemia / lupus / kidney infections and diseases / varicose veins / Chronic Fatigue Syndrome / pulmonary disease / influenza / eczema.

Aerobic Oxygen™ is a concentrated product and should not be confused with diluted imitations claiming to be Aerobic Oxygen™.

DISCLAIMER: "AEROBIC OXYGEN™" heals nothing in itself. It helps raise the oxygen level in the bloodstream to the point where the body can do what God has designed it to do — keep itself healthy and heal itself.

FDA required disclaimer: "information given here is for research and educational purposes only and is NOT intended to prescribe treatment."

BE AWARE Make sure your bottle says "Manufactured and distributed by Good For You Canada Corporation". Counterfeit products are now being marked, some are even using our registered trade name AEROBIC OXYGEN™.

The information given here is for research and educational purposes only and is NOT intended to prescribe, or as a treatment. Aerobic Oxygen™ is not a drug. No claims can be made as to its benefits. Any reference to benefits are related to personal experiences from users of the product.
